AMENDMENT UNDER 37 C.F.R. § 1,111 AND STATEMENT OF SUBSTANCE OF INTERVIEW

Application No.: 10/743,437

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the

Attorney Docket No.: Q78963

application:

LISTING OF CLAIMS:

1. (canceled).

2. (currently amended): The method for producing a light-transmitting

electromagnetic wave-shielding film according to claim 1 claim 6, wherein the silver salt in the

silver salt-containing layer is a silver halide.

3. (original): The method for producing a light-transmitting electromagnetic wave-

shielding film according to claim 2, wherein the silver halide consists mainly of silver bromide.

4. (original): The method for producing a light-transmitting electromagnetic wave-

shielding film according to claim 2, wherein the silver halide contains a rhodium compound

and/or an iridium compound.

5. (original): The method for producing a light-transmitting electromagnetic wave-

shielding film according to claim 2, wherein the silver halide contains Pd(II) ions and/or Pd

metal.

AMENDMENT UNDER 37 C.F.R. § 1.111 AND STATEMENT OF SUBSTANCE OF INTERVIEW

Application No. 10/742 427

Application No.: 10/743,437

Attorney Docket No.: Q78963

6. (currently amended): The method A method for producing a light-transmitting electromagnetic wave-shielding film-according to claim 1 having a conductive metal portion and a light transmitting portion, which comprises

exposing a silver salt-containing layer to an electromagnetic wave, wherein the silver salt-containing layer contains a silver salt and the silver salt-containing layer is provided on a support,

developing said exposed silver salt-containing layer with a development technique used for a silver salt photographic film so as to form a metal silver portion, and

subjecting the metal silver portion to physical development and/or plating to form the conductive metal portion consisting of the metal silver portion carrying conductive metal particles;

wherein the silver salt-containing layer contains Ag and a binder and has an Ag/binder volume ratio of 1/4 or higher.

- 7. (currently amended): The method for producing a light-transmitting electromagnetic wave-shielding film according to claim 1 claim 6, wherein the silver salt in the silver salt-containing layer has a diameter as sphere of 0.1 to 100 nm.
- 8. (currently amended): The method for producing a light-transmitting electromagnetic wave-shielding film according to claim 1 claim 6, wherein the developer used for the development of the silver salt-containing layer is a lith developer.

AMENDMENT UNDER 37 C.F.R. § 1,111 AND STATEMENT OF SUBSTANCE OF INTERVIEW

Application No.: 10/743,437

Attorney Docket No.: 078963

9. (currently amended): The method for producing a light-transmitting

electromagnetic wave-shielding film according to-elaim 1 claim 6, wherein an exposed portion

after the development contains the metal silver at a content of 50% by weight or more based on

the weight of silver contained in the exposed portion before the exposure.

10. (currently amended): The method for producing a light-transmitting

electromagnetic wave-shielding film according to claim 1 claim 6, wherein the plating is

performed by electroless plating.

11. (currently amended): The method for producing a light-transmitting

electromagnetic wave-shielding film according to claim 1 claim 6, wherein the surface of the

conductive metal portion is further subjected to a blackening treatment.

12. (currently amended): The method for producing a light-transmitting

electromagnetic wave-shielding film according to-elaim 1 claim 6, wherein the light-transmitting

portion does not substantially contain physical development nuclei.

13. (currently amended): The method for producing a light-transmitting

electromagnetic wave-shielding film according to elaim 1 claim 6, wherein the light-transmitting

electromagnetic wave-shielding film has a surface resistance of 2.5 Ω /sq or lower after the

physical development and/or plating, and/or the light-transmitting portion has a transmittance of

95% or higher.

AMENDMENT UNDER 37 C.F.R. § 1,111 AND

STATEMENT OF SUBSTANCE OF INTERVIEW

Application No.: 10/743,437

14. (withdrawn - currently amended): A light-transmitting electromagnetic wave-

Attorney Docket No.: Q78963

shielding film having a conductive metal portion and a light-transmitting portion, which is

obtainable by the production method according to claim 1 claim 6.

15. (withdrawn): The light-transmitting electromagnetic wave-shielding film

according to claim 14, wherein weight of silver contained in the conductive metal portion

accounts for 50% by weight or more of the total weight of metal components contained in the

conductive metal portion.

16. (withdrawn): The light-transmitting electromagnetic wave-shielding film

according to claim 14, wherein the total weight of silver, copper and palladium contained in the

conductive metal portion accounts for 80% by weight or more of the total weight of the all metal

components.

17. (withdrawn): The light-transmitting electromagnetic wave-shielding film

according to claim 14, wherein a layer comprising the conductive metal particles carried by the

conductive metal portion has a thickness of 0.1 µm or larger and less than 5 µm and a surface

resistance value of 3 Ω /sq or smaller.

AMENDMENT UNDER 37 C.F.R. § 1.111 AND STATEMENT OF SUBSTANCE OF INTERVIEW

Application No.: 10/743,437

18. (withdrawn): The light-transmitting electromagnetic wave-shielding film

Attorney Docket No.: 078963

according to claim 14, wherein the conductive metal portion has a line width of 0.1 µm or larger

and smaller than 18 µm.

19. (withdrawn): A plasma display panel having the light-transmitting

electromagnetic wave-shielding film according to claim 14.

20. (canceled).

21. (currently amended): A method for producing a light-transmitting

electromagnetic wave-shielding film according to Claim 1 claim 6, wherein the support is a

plastic film, a plastic plate or a glass plate.

22. (new): A method for producing a light-transmitting electromagnetic wave-

shielding film according to claim 6, additionally comprising removing silver-salt from

unexposed regions of the silver-salt containing layer.

23. (new): A method for producing a light-transmitting electromagnetic wave-

shielding film according to claim 6, wherein the silver halide functions as an optical sensor.

24. (new): A method for producing a light-transmitting electromagnetic wave-

shielding film according to claim 6, wherein the binder includes water-soluble polymers.

AMENDMENT UNDER 37 C.F.R. § 1.111 AND STATEMENT OF SUBSTANCE OF INTERVIEW

Application No.: 10/743,437

Attorney Docket No.: Q78963

25. (new): A method for producing a light-transmitting electromagnetic waveshielding film according to claim 6, wherein the binder includes gelatin.

26. (new): A method for producing a light-transmitting electromagnetic waveshielding film according to claim 6, additionally comprising fixing the developed and exposed

silver salt-containing layer.
